EDUCATION

Indian Institute of Information Technology Vadodara

Sep 2023 – Present

Bachelor of Technology in Computer Science and Engineering

CPI: 8.15

TECHNICAL SKILLS

Programming Languages: C++, JavaScript, TypeScript, Python, SQL

Web Technologies & Frameworks: React.js, Redux, Node.js, Express.js, HTML5, CSS3, Socket.IO

Databases & ORMs: MongoDB, MySQL, PostgreSQL, Prisma ORM

Developer tools: Git/GitHub, VS Code, Linux, MATLAB, Figma, Postman

Concepts: Object-Oriented Programming, Computer Networks, Database Management, Data Structures & Algorithms

WORK EXPERIENCE

Modelsuite.ai

July 2025 – Sep 2025

Full Stack Developer Intern

- Built three core platform features (support ticketing, task management, news feed) using **MERN stack**, **Redux**, **shadcn UI**, and **dnd-kit**, serving as critical user engagement tools with seamless **Freshdesk** integration for customer support automation.
- Engineered a drag-and-drop task management system with **React**, **Redux**, and **dnd-kit** enabling real-time tracking and prioritization, with **session-based authentication** for secure access.
- Developed **15+ RESTful APIs** using **Node.js/Express.js** and **MongoDB** for tickets, tasks, and updates, integrating **Freshdesk API** to streamline support operations.

PROJECTS

GovBizConnect 🌐 | *React, Flask, Python, TensorFlow, NLP, Google Cloud API*

Mar 2025

- Architected an **AI-powered multi-modal search engine** supporting text, image, voice, and document inputs using **Flask backend** and **TensorFlow models**, achieving **90%+ accuracy** with **<2s** response times for NIC code classification and government scheme recommendations.
- Developed **multilingual support** including regional language Valgera with **voice-enabled interface** and simplified **React UI** to improve accessibility for rural and visually impaired users.

DesignFlow XR 🌐 | *React, Framer Motion, Node.js, Gemini API, Unsplash API, Colormind API*

April 2025

- Built a **gesture-powered design canvas** with **hand gesture recognition** and **voice-to-design** via **Gemini API**, enabling hands-free UI/UX creation through multimodal input.
- Integrated **Unsplash API** for real-time image search with **automatic color palette extraction**, allowing designers to discover and apply professional color schemes directly from imagery to canvas elements.
- Developed **AI-powered moodboard generation** using **Gemini API** for contextual suggestions and **Colormind API** for color recommendations, streamlining the creative ideation process.

POSITION OF RESPONSIBILITY

Secretary

Aug 2025 – Present

IITV Mathematics Club

- Orchestrated **6+ mathematics workshops** and competitive programming sessions & Coordinated **4 inter-college mathematical competitions** with **200+ participants**

ACHIEVEMENTS

Hackathons: Secured **2nd Prize at Finnovate Hack 2025** & **3rd Prize at Hack The Future 2024 at IIEC IIT Gandhinagar**, shortlisted in **Top 100 among 4000+ participants**.

Competitions: Won **2nd Prize in HackIITV (Web Track)** for building an AI-powered design platform; qualified for **Flipkart Grid 6.0 Round 2 (Top 3,500/19,000+)**.

Problem Solving: Solved **500+ DSA questions** across multiple coding platforms including LeetCode and GeeksForGeeks
